Profile Summary

- Computer Science undergraduate with strong proficiency in backend development using Java, Python, and FastAPI. Experienced in building scalable full-stack applications and REST APIs. Passionate about fintech systems, distributed architecture, and solving real-world problems using efficient data structures and algorithms.

EDUCATION

Institute of Technical Education and Research SOA University

2023 – 2027

B. Tech in Computer Science and Engineering CGPA - 7.86

Bhubaneswar, Odisha India

Oxford Public School

2022 – 2023

*CBSE Board - Science - **Percentage - 71.83%***

Ranchi, Jharkhand

Guru Gobind Singh Public School

2021 – 2022

*CBSE Board - **Percentage - 91.2%***

Daltonganj, Jharkhand

COURSEWORK / SKILLS

- Web Development
- Operating Systems
- Database Management
- OOPS Concept
- DSA
- Network Security
- System (DBMS)

PROJECTS

AgriRoots | (Crop Information Platform)

January 2025

- Developed a full-stack web application using React and REST APIs to deliver agricultural insights. Designed responsive UI and optimized data fetching for improved performance and user experience. Enabled efficient access to crop, techniques, and equipment-related information.

SurePay | SaaS

April 2026

- SurePay ML-powered Parametric Insurance Platform Built a scalable backend using FastAPI and PostgreSQL to handle real-time insurance data processing. Designed a decoupled microservices-based architecture, improving modularity and deployment efficiency. Implemented GPS spoofing detection using sensor-fusion techniques to reduce fraud risks. Containerized the application using Docker for consistent and reliable deployment.

TECHNICAL SKILLS

Programming Languages: Java, C++ (basics), Python

Databases: MySQL, PostgreSQL

Other Skills: Data Structures and Algorithms, Object-Oriented Programming (OOP), Machine Learning

Tools: GitHub, VS Code, Linux, Jupyter Notebook

ACHIEVEMENTS

- Guidewire DEVTrails University Hackathon 2026 Collaborated with a team project to design and pitch an AI-powered InsurTech solution for the gig economy.
- Participated in coding contests on multiple platforms, enhancing problem-solving skills.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Front End Web Developer Certification – Infosys Springboard (2026)

EXTRA CURRICULAR ACTIVITIES

- Detailed 3D models and vehicle designs (complete car builds) using Blender, including modeling, texturing.
