SKILLS

Frontend & Language: JAVA, Python, HTML, CSS, JavaScript, ReactJS

Backend: NodeJS, REST APIs

Database: MySQL

Dev Tools & Platforms: Git, GitHub, Postman, Linux

PROJECTS

Life Drop:

- LifeDrop is a full-stack blood donation and emergency blood request platform with an admin web dashboard and a mobile app for donors and blood requesters.
- The system helps match compatible donors with nearby patients, verifies users through Aadhaar details, tracks donor eligibility, supports QR-based donation verification, and keeps donation history after completion.

Typing Master:

- Developed an interactive Typing Speed Tester using HTML, CSS, and JavaScript. Implemented real-time WPM calculation, accuracy tracking, error detection, timer control, and dynamic UI rendering.

CERTIFICATIONS

Oracle Certified Foundations Associate - Agentic AI:

Completed the Oracle Certified Foundations Associate (Agentic AI) certification, acquiring foundational knowledge of AI agents, foundation models, and core artificial intelligence concepts.

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate:

Completed the Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate certification, acquiring foundational knowledge of artificial intelligence, machine learning concepts, and Oracle Cloud Infrastructure AI services.

Infosys Certificate of Frontend Development:

Completed The Infosys Springboard Program, in HTML, CSS3 and JavaScript.

WORKSHOP

GuideWire DEVTrails University Hackathon 2026:

Collaborated with a team project to design and pitch an AI-powered InsurTech solution for the gig economy.
