About Me

Computer Science undergraduate with hands-on experience through projects in full-stack development and AI-powered applications using React.js, Node.js, SQL, GenAI, and Agentic AI(basics). Experienced in applying theory through practical projects and building structured solutions, with an academic background in DSA and DBMS. Focused on learning new technologies, solving problems, and turning ideas into working applications.

Education

SOA University, ITER, Bhubaneswar <i>B.Tech in Computer Science and Engineering</i>	2023 – 2027 <i>CGPA: 8.67/10</i>
Tetrahedron Junior College, Bhubaneswar <i>Class XII</i>	2021 – 2023 <i>73.4%</i>
Damodara High School, Kendrapada <i>Class X</i>	2019 – 2021 <i>80.03%</i>

Projects

HealthBridge <i>React.js, Node.js, Express.js, MySQL, GenAI, Leaflet</i>	2025
– Developed a full-stack AI-assisted doctor discovery platform using React.js, Node.js, Express.js, and MySQL with symptom-based doctor search, specialization, ratings, availability, and location. – Integrated GenAI symptom guidance, JWT authentication, and appointment booking to recommend relevant doctor specializations. – Added location-based discovery using Leaflet and OpenStreetMap for nearby doctors, clinics, and appointment availability.	
AI Student Helpdesk <i>React.js, FastAPI, GenAI, RAG, PostgreSQL, pgvector</i>	2026
– Developed a GenAI-powered student helpdesk using React.js, FastAPI, PostgreSQL, and pgvector for academic and placement assistance. – Implemented an Agentic AI workflow with tool calling for student data retrieval, policy search using RAG, eligibility checks, and support ticket creation. – Built a PDF retrieval pipeline using embeddings to provide grounded responses from college rules, FAQs, and placement policies.	
QuickServiceHub <i>React.js, Node.js, Express.js, MongoDB, REST APIs</i>	2026
– Developed a full-stack service booking platform using React.js, Node.js, Express.js, and MongoDB for connecting customers with local service providers. – Implemented authentication, service booking, provider assignment, booking status tracking, and admin monitoring using REST APIs. – Added OTP-based service verification and customer feedback for secure service tracking.	

Technical Skills

Programming Languages: Java, Python, C, C++, JavaScript, SQL
Frameworks: React.js, Node.js, Express.js, FastAPI
Databases: MySQL, MongoDB, PostgreSQL(basics)
AI/ML: GenAI(basics), Agentic AI(basics), Machine Learning
Tools: Git, GitHub
Core Concepts: DSA, DBMS, Operating Systems, Computer Networks

Certifications

• ReactJS	2026
• SQL Basics – Simplilearn	2026
• Agentic AI(basics) – Oracle	2026

Achievements & Activities

• Participated in DevTrain Hackathon	2025
